Evaluation

Three TODOs:

(1) Homeworks 1, 2, 3 and 4, due before the next day’s presentation:
   · choose one question to answer;
   · not graded, but some effort is appreciated as a token of goodwill.

(2) Presenting one paper from the literature:
   · you can choose the paper (from the website, or on your own);
   · around 30 mins, including questions;
   · attendance required.

(3) Final assignment:
   · A survey paper, touching on at least 2 papers;
   · A research paper, looking at a new model and answering some interesting question;
   · An implementation of something, e.g., a simulation, or experiments, based on the literature.
Schedule

Week 1:
- Presentations by me, at 11:00 – 12:30.
- Homeworks from previous day due before presentation starts.
  - Last homework can be handed in following Monday.

Week 2:
- Individual work: looking at the literature, deciding on a research topic for the final assignment.
- Face to face meetings with me to discuss this, towards the end of the week.

Week 3:
- Student presentations on their chosen topic, towards the end of the week.

Week 4:
- Handing in the final assignment, by the end of the week.
