Recap

What we saw last time..

- The classes Σ_i^P and Π_i^P
- The Polynomial Hierarchy
- Σ_i^P-complete and Π_i^P-complete QBF problems
- Characterizations using oracles and ATMs

What will we do today?

- Reflecting on what we've seen before
- Mostly using examples (of games)

One-/two-liner overview of complexity classes

- L: deterministic algorithm, logarithmic space (and polynomial time)
- NL: nondeterministic algorithm, logarithmic space (and polynomial time)
- P: solvable in (deterministic) polynomial time
- NP: solutions (*for yes-answers*) can be guessed/checked in polynomial time
- coNP: solutions (*for no-answers*) can be guessed/checked in polynomial time
- Σ_2^p: solutions (*for yes-answers*) have "$\exists\forall$ structure"
- Π_2^p: solutions (*for yes-answers*) have "$\forall\exists$ structure"
- PSPACE: (non)deterministic algorithm, polynomial space (and exponential time)
  OR: unbounded "$\exists\forall\exists\forall\cdots$ structure"
- EXP: solvable in (deterministic) exponential time

Some oracle questions..

- Is it the case that $P^P = P$?

Some oracle questions..

- Is it the case that $P^P = P$? Yes

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$?

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..
- Is it the case that $PSPACE^{PSPACE} = PSPACE$?

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..
- Is it the case that $PSPACE^{PSPACE} = PSPACE$? Yes

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..
- Is it the case that $PSPACE^{PSPACE} = PSPACE$? Yes
- Is it the case that $EXP^{EXP} = EXP$?

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..
- Is it the case that $PSPACE^{PSPACE} = PSPACE$? Yes
- Is it the case that $EXP^{EXP} = EXP$? No

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..
- Is it the case that $PSPACE^{PSPACE} = PSPACE$? Yes
- Is it the case that $EXP^{EXP} = EXP$? No
- Is it the case that $DTIME(n^2)^{DTIME(n^2)} = DTIME(n^2)$?

Some oracle questions..

- Is it the case that $P^P = P$? Yes
- Is it the case that $NP^{NP} = NP$? We don't know..
- Is it the case that $PSPACE^{PSPACE} = PSPACE$? Yes
- Is it the case that $EXP^{EXP} = EXP$? No
- Is it the case that $DTIME(n^2)^{DTIME(n^2)} = DTIME(n^2)$? No

Some oracle questions..

- Is it the case that $\mathrm{P}^{\mathrm{P}} = \mathrm{P}$? Yes
- Is it the case that $\mathrm{NP}^{\mathrm{NP}} = \mathrm{NP}$? We don't know..
- Is it the case that $\mathrm{PSPACE}^{\mathrm{PSPACE}} = \mathrm{PSPACE}$? Yes
- Is it the case that $\mathrm{EXP}^{\mathrm{EXP}} = \mathrm{EXP}$? No
- Is it the case that $\mathrm{DTIME}(n^2)^{\mathrm{DTIME}(n^2)} = \mathrm{DTIME}(n^2)$? No
- Is it the case that $\mathrm{NTIME}(n)^{\mathrm{NTIME}(n)} = \mathrm{NTIME}(n)$?

Some oracle questions..

- Is it the case that $\mathrm{P}^{\mathrm{P}} = \mathrm{P}$? Yes
- Is it the case that $\mathrm{NP}^{\mathrm{NP}} = \mathrm{NP}$? We don't know..
- Is it the case that $\mathrm{PSPACE}^{\mathrm{PSPACE}} = \mathrm{PSPACE}$? Yes
- Is it the case that $\mathrm{EXP}^{\mathrm{EXP}} = \mathrm{EXP}$? No
- Is it the case that $\mathrm{DTIME}(n^2)^{\mathrm{DTIME}(n^2)} = \mathrm{DTIME}(n^2)$? No
- Is it the case that $\mathrm{NTIME}(n)^{\mathrm{NTIME}(n)} = \mathrm{NTIME}(n)$? We don't know..

Some oracle questions..

- Is it the case that $\mathrm{P}^{\mathrm{P}} = \mathrm{P}$? Yes
- Is it the case that $\mathrm{NP}^{\mathrm{NP}} = \mathrm{NP}$? We don't know..
- Is it the case that $\mathrm{PSPACE}^{\mathrm{PSPACE}} = \mathrm{PSPACE}$? Yes
- Is it the case that $\mathrm{EXP}^{\mathrm{EXP}} = \mathrm{EXP}$? No
- Is it the case that $\mathrm{DTIME}(n^2)^{\mathrm{DTIME}(n^2)} = \mathrm{DTIME}(n^2)$? No
- Is it the case that $\mathrm{NTIME}(n)^{\mathrm{NTIME}(n)} = \mathrm{NTIME}(n)$? We don't know..

P vs. NP

- Polls on $\mathsf{P} \stackrel{?}{=} \mathsf{NP}$ have been held among computational complexity researchers:
  - In 2002, see: `https://tiny.cc/pnp-poll1`
  - In 2012, see: `https://tiny.cc/pnp-poll2`
  - In 2019, see: `https://tiny.cc/pnp-poll3`
- In these papers, there are some very interesting opinions on the question (and some nerdy jokes)
- Short answer: we have no clue (really), why $\mathsf{P} = \mathsf{NP}$ or $\mathsf{P} \neq \mathsf{NP}$ would be true, but most think that $\mathsf{P} \neq \mathsf{NP}$.

Quiz example #1: checking if a given solution is unique

- What is the complexity of this problem? coNP-complete
- *Input:* A propositional formula φ, and a satisfying truth assignment α for φ.
  Question: Is α the only satisfying assignment for φ?

$\varphi \wedge$ "$\neg \alpha$"

Quiz example #2: finding a minimal equivalent DNF formula

- What is the complexity of this problem? Σ_2^P-complete
- *Input:* A propositional formula φ, and 1^k for some $k \in \mathbb{N}$.
  Question: Is there a DNF formula ψ of size $\leq k$ such that $\varphi \equiv \psi$?

$\exists$ $\forall$

Quiz example #3: equivalence of propositional logic formulas

- What is the complexity of this problem? coNP
- *Input:* Two propositional formulas φ_1, φ_2.
  Question: $\varphi_1 \equiv \varphi_2$?

$\forall$

$\varphi \in UNSAT$ if and only if $\varphi \equiv \bot = (p \wedge \neg p)$

Quiz example #4: 2SAT

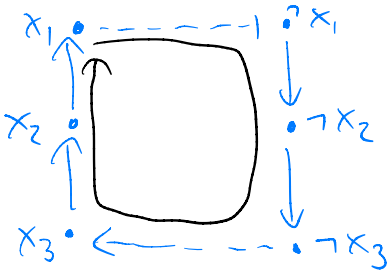
- What is the complexity of this problem? NL-complete
- *Input:* A propositional 2CNF formula φ.
  Question: Is φ satisfiable?

in NP

$(\neg x_1) \wedge (x_1 \vee \neg x_2) \wedge (x_2 \vee \neg x_3) \wedge (x_3)$

$\neg x_1 \to \neg x_2$ $\quad$ $\neg x_2 \to \neg x_3$

$x_2 \to x_1$ $\quad$ $x_3 \to x_2$



Quiz example #5: satisfiability of modal logic K

- What is the complexity of this problem? PSPACE-complete
- *Input:* A basic modal logic formula φ.
  Question: Is φ satisfiable?

Tableau-algorithm runs in poly-space

Quiz example #6: satisfiability of modal logic S5

- What is the complexity of this problem?
- *Input:* A modal logic formula φ.

  Question: Is there an S5 Kripke model where φ is true?

Quiz example #6: satisfiability of modal logic S5

- What is the complexity of this problem? NP-complete
- *Input:* A modal logic formula φ.

  Question: Is there an S5 Kripke model where φ is true?

- **Theorem:** if there is an S5 Kripke model where φ is true, then there exists an S5 Kripke model with at most $|\varphi|$ states where φ is true.

Quiz example #7: Tiling I

- What is the complexity of this problem?

- *Input:* A set of 4-sided tile types, and $n, m \in \mathbb{N}$. $\rightsquigarrow 1^n, 1^m$

  Question: Can we use these tile types to fill an $n \times m$ grid, so that
  (1) the outsides of the grid all have side s_0, and
  (2) neighboring tiles have matching sides?

NP-complete

Quiz example #8: Tiling II

- What is the complexity of this problem? PSPACE-complete

- *Input:* A set of 4-sided tile types, and $n \in \mathbb{N}$.

  Question: Can we use these tile types to fill an $n \times m$ grid, for some $m \in \mathbb{N}$, so that

  (1) the outsides of the grid all have side s_0, and
  (2) neighboring tiles have matching sides?

Quiz example #9: Greedy Spiders

- What is the complexity of this problem?
- *Input:* An instance I of the *greedy spiders* puzzle.
  Question: Is there a solution for I?

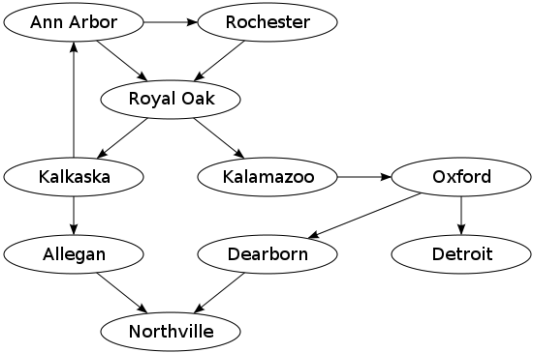
Quiz example #10: Generalized Geography

- What is the complexity of this problem? (See: `https://en.wikipedia.org/wiki/Generalized_geography`)

PSPACE-complete

- *Input:* An instance I of *generalized geography*.

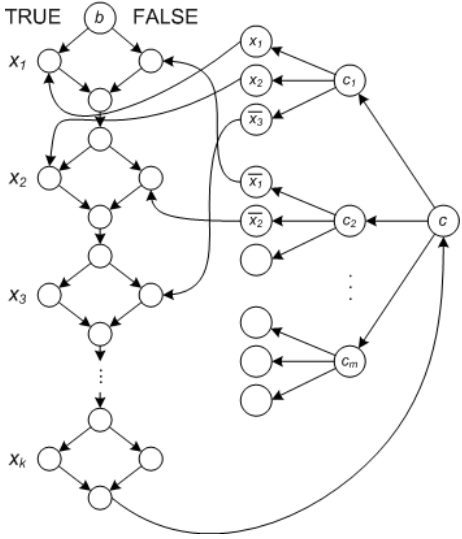
  Question: Does Player 1 have a winning strategy?



Quiz example #10: Generalized Geography

- What is the complexity of this problem? (See: `https://en.wikipedia.org/wiki/Generalized_geography`)
- *Input:* An instance I of *generalized geography*.

  Question: Does Player 1 have a winning strategy?



Quiz example #11: Game of the Amazons (2 players)

- What is the complexity of this problem?
  (See: `https://en.wikipedia.org/wiki/Game_of_the_Amazons`)

- *Input:* A (2-player) Game of the Amazons position (on an $n \times n$ board).

  Question: Does Player 1 have a winning strategy?

Quiz example #12: Game of the Amazons (1 player)

- What is the complexity of this problem?
  (See: `https://en.wikipedia.org/wiki/Game_of_the_Amazons`)

- *Input:* A (1-player) Game of the Amazons position (on an $n \times n$ board), and 1^k for some $k \in \mathbb{N}$.

  Question: Can Player 1 make at least k consecutive moves?

Quiz example #13: reachability in succinctly represented graphs

- What is the complexity of this problem?

- *Input:* A propositional logic formula $\varphi(x_1, \ldots, x_n, x'_1, \ldots, x'_n)$, and two binary vectors $s, t \in \{0,1\}^n$.

  Question: Consider the directed graph $G = (V, E)$, where: $V = \{0,1\}^n$, and for each $\overline{v}, \overline{w} \in V$, $(\overline{v}, \overline{w}) \in E$ if and only if $\varphi[\overline{u}, \overline{w}]$ is true.

  Is t reachable from s in G?

Quiz example #14: 3-colorability for succinctly represented graphs

- What is the complexity of this problem?

- *Input:* A propositional logic formula $\varphi(x_1, \ldots, x_n, x'_1, \ldots, x'_n)$, and two binary vectors $s, t \in \{0,1\}^n$.

  Question: Consider the undirected graph $G = (V, E)$, where: $V = \{0,1\}^n$, and for each $\overline{v}, \overline{w} \in V$, $\{\overline{v}, \overline{w}\} \in E$ if and only if $\varphi[\overline{u}, \overline{w}]$ is true.

  Is G 3-colorable?

Next time

- Non-uniform complexity
- Circuit complexity
- TMs that take advice
- The Karp-Lipton Theorem
