

Errata in “Jozef Meixner: his life and his orthogonal polynomials”

These are errata for the paper

P. L. Butzer and T. H. Koornwinder, *Josef Meixner: his life and his orthogonal polynomials*, Indag. Math. (N.S.) 30 (2019), 250–264; [arXiv:1609.02588](#).

In Section 5, Case VI the generating function for Krawtchouk polynomials should read:

$$\exp\left(x \log\left(\frac{1 + (1 - p^{-1})t}{1 + t}\right)\right) (1 + t)^N = \sum_{n=0}^N \binom{N}{n} K_n(x; p, N) t^n \quad (x = 0, 1, \dots, N),$$

This has already been corrected in the last arXiv version v4.
