Topics:

1. Announcement: Nominations for **George Pólya** Prize in Mathematics
2. Announcement: Request for **Askey** PDF's
3. Special Issue on: Orthogonal Polynomials, Special Functions and Applications
4. Preprints in arXiv.org
5. Submitting contributions to OP-SF NET and SIAM-OPSF (OP-SF Talk)
6. Thought of the Month by **Lucy Joan Slater**

## Calendar of Events:

### June 7–11, 2021

33<sup>rd</sup> International Colloquium on Group Theoretical Methods in Physics (Group33)

Cotonou, Benin

<http://www.cipma.net/group33-cotonou-benin>

### June 20–26, 2021

8<sup>th</sup> European Congress of Mathematics (8ECM)

Mini-symposium on Orthogonal Polynomials and Special Functions

Organized by Paco Marcellán, Juan J. Moreno-Balcázar and Galina Filipuk,

Portorož, Slovenia—**Now virtual due to coronavirus pandemic.**

<https://www.8ecm.si/minisymposia>

### July 19–24, 2021

Mathematical Congress of the Americas (MCA 2021)

Special Session on *Special Functions and Orthogonal Polynomials*

Organized by Diego Dominici, Luis E. Garza, Jan Felipe van Diejen

Buenos Aires, Argentina—**Now virtual due to coronavirus pandemic.**

<http://www.mca2021.org/en>

**January 10–14, 2022—Updated new date due to coronavirus pandemic.**

9<sup>th</sup> International Conference on Computational Methods and Function Theory (CMFT 2021)  
Federico Santa María Technical University, Valparaíso, Chile  
<http://cmft2021.inf.utfsm.cl/>

**August 2022—Updated new date due to coronavirus pandemic.**

OPSFA Summer School 2021  
Radboud University, Nijmegen, The Netherlands  
<https://www.ru.nl/radboudsummerschool/courses/2021/opsfa-summer-school/>

**Summer 2022—Tentative new date due to coronavirus pandemic.**

Functional Analysis, Approximation Theory and Numerical Analysis (FAATNA)  
Matera, Italy  
<http://web.unibas.it/faatna20/>

**Summer, 2022—Tentative new dates due to coronavirus pandemic.**

OPSFA-16  
Centre de Recherches Mathématiques, Montreal, Canada

Topic #1 ——— OP – SF Net 28.3 ——— May 15, 2021

From: Walter Van Assche ([walter.vanassche@kuleuven.be](mailto:walter.vanassche@kuleuven.be))

Subject: Announcement: Nominations for **George Pólya** Prize in Mathematics

The George Pólya Prize in Mathematics is awarded every four years for a significant contribution, as evidenced by a refereed publication, in an area of mathematics of interest to George Pólya not covered by the George Pólya Prize in Applied Combinatorics or the George Pólya Prize for Mathematical Exposition. Such areas may include approximation theory, complex analysis, number theory, orthogonal polynomials, probability theory, and mathematical discovery and learning. The prize is broadly intended to recognize specific recent work. The deadline for submission of nominations (that must include "two or three letters of support from experts") is October 15, 2021. More information and submission of nominations can be found at <https://www.siam.org/prizes-recognition/major-prizes-lectures/detail/george-polya-prize-for-mathematics>

Topic #2 ——— OP – SF Net 28.3 ——— May 15, 2021

From: Howard Cohl ([howard.cohl@nist.gov](mailto:howard.cohl@nist.gov))

Subject: Announcement: Request for **Askey** PDF's

If you have a PDF or image of a paper, correspondence or note by by Dick Askey, I would request that you contact me and send me those documents. In collaboration with the expert in-house staff bibliographer at [Celebratio Mathematica](#), they are assembling a full bibliography of Dick's works in connection with the Liber Amicorum for Dick Askey. These PDFs/images will be invaluable for our search and publication. If you perhaps have some especially rare or hard to find copy of one of Dick's papers, we would gratefully appreciate that.

Topic #3 ——— OP – SF Net 28.3 ——— May 15, 2021

From: Gradimir V. Milovanovic ([gvm@mi.sanu.ac.rs](mailto:gvm@mi.sanu.ac.rs))

Subject: Special Issue on: Orthogonal Polynomials, Special Functions and Applications

The journal [Axioms](#) will publish a special issue entitled:  
*Orthogonal Polynomials, Special Functions and Applications*.

The guest editor for this special issue is [Gradimir V. Milovanović](#).

This Special Issue of Axioms is devoted to various aspects of the theory of orthogonality in real or complex spaces with respect to the standard inner product (classical and strongly nonclassical cases) and moment functionals, including one-dimensional and multidimensional cases. Contributions considering the development and application of special functions, as well as problems in which special functions play a significant role, are welcome. Particularly interesting are theories and applications in which both orthogonality and special functions are represented. Consideration of problems in which special functions play a significant role, as well as applications of orthogonal polynomials in approximation theory in the broadest sense, including quadrature formulas and integral equations, will be particularly appreciated. Furthermore, applications and algorithms for solving open problems in mathematics, physics, and technical sciences are of interest.

Scope: Orthogonal polynomials on the real line; Orthogonal polynomials on the unit circle; Matrix orthogonal polynomials; Multiple orthogonal polynomials; Multivariate orthogonal polynomials; Sobolev orthogonal polynomials; Integrable systems; Random matrices; Quadrature and cubature formulas; Rational approximation; Approximation with splines; Wavelets.

The special issue title is:

*Orthogonal Polynomials, Special Functions and Applications*.

The deadline for manuscript submissions is: 1 December 2021.

The webpage for the special issue is can be found here: [link](#).

To submit a manuscript to this special issue, go to this [link](#).

Topic #4 ——— OP – SF Net 28.3 ——— May 15, 2021

From: OP–SF Net Editors

Subject: Preprints in arXiv.org

The following preprints related to the fields of orthogonal polynomials and special functions were posted or cross-listed to one of the subcategories of arXiv.org during March and April 2021. This list has been separated into two categories.

### OP–SF Net Subscriber E–Prints

<http://arxiv.org/abs/2103.00337>

Extreme Superposition: High–Order Fundamental Rogue Waves in the Far–Field Regime  
Deniz Bilman, Peter D. Miller

<http://arxiv.org/abs/2103.01652>

Pascal triangle, Hoggatt matrices, and analogous constructions  
Johann Cigler

<http://arxiv.org/abs/2103.01725>

Notes on solutions of KZ equations modulo  $p^s$  and  $p$ -adic limit  $s \rightarrow \infty$   
Alexander Varchenko

<http://arxiv.org/abs/2103.02094>

Spatial asymptotics of Green’s function and applications

Sergey A. Denisov

<http://arxiv.org/abs/2103.02291>

The asymptotic expansion of a function due to L.L. Karasheva  
R. B. Paris

Topic #5 ——— OP – SF Net 28.3 ——— May 15, 2021

From: OP–SF Net Editors

Subject: Submitting contributions to OP–SF NET and SIAM–OPSF (OP–SF Talk)

To contribute a news item to OP–SF NET, send e–mail to one of the OP–SF Editors  
[howard.cohl@nist.gov](mailto:howard.cohl@nist.gov), or [spost@hawaii.edu](mailto:spost@hawaii.edu).

Contributions to OP–SF NET 28.4 should be sent by July 1, 2021.

OP–SF NET is an electronic newsletter of the SIAM Activity Group on Special Functions and Orthogonal Polynomials. We disseminate your contributions on anything of interest to the special functions and orthogonal polynomials community. This includes announcements of conferences, forthcoming books, new software, electronic archives, research questions, and job openings as well as news about new appointments, promotions, research visitors, awards and prizes. OP–SF Net is transmitted periodically through a post to SIAM–OPSF (OP–SF Talk).

SIAM–OPSF (OP–SF Talk) is a listserv of the SIAM Activity Group on Special Functions and Orthogonal Polynomials, which facilitates communication among members, and friends of the Activity Group. See the previous Topic. To post an item to the listserv, send e–mail to [siam-opsf@siam.org](mailto:siam-opsf@siam.org).

WWW home page of this Activity Group:

<http://math.nist.gov/opsf>

Information on joining SIAM and this activity group: [service@siam.org](mailto:service@siam.org)

The elected Officers of the Activity Group (2020–2022) are:

Peter Alan Clarkson, Chair

Luc Vinet, Vice Chair

Andrei Martínez–Finkelshtein, Program Director

Teresa E. Pérez, Secretary and OP–SF Talk moderator

The appointed officers are:

Howard Cohl, OP–SF NET co–editor

Sarah Post, OP–SF NET co–editor

Diego Dominici, OP–SF Talk moderator

Bonita Saunders, Webmaster and OP–SF Talk moderator

From: OP–SF Net Editors

Subject: Thought of the Month by **Lucy Joan Slater**

“In his work *Arithmetica Infinitorum* (1655), the Oxford professor John Wallis (1616–1703) first used the term ‘hypergeometric’ (from the Greek  $\acute{\upsilon}\pi\epsilon\rho$ , above or beyond) to denote any series which was beyond the ordinary geometric series

$$1 + x + x^2 + x^3 + \dots$$

In particular, he studies the series

$$1 + a + a(a + 1) + a(a + 1)(a + 2) + \dots$$

”

**Lucy Joan Slater** (1922–2008), quoted in *Generalized Hypergeometric Functions*, by L. J. Slater, Cambridge University Press, Cambridge, UK, 1966.
